

For the collection of soil from SQ Environmental located at 'Bunkers Quarry'.

LOW ECONOMY GRADE SOIL

Low Economy Grade Soil

This is derived from a topsoil of lower quality than general purpose grade topsoil or a material such as subsoil or friable mineral matter which is suitable for plant growth, for example, greensand, river silt or glacial moraine. It is divided into materials of 'low clay' and 'high clay' subgrades. This material is suitable for amenity woodland, wildlife conservation areas, less intensively used amenity grassland and agricultural land of low inherent productivity.

(Please acknowledge you agree to apply / deliver soil for the purpose as quoted above)

Company collecting soil:

Company Address:

Name (Printed):

Signature:

Date:

Position held within the company:

The above must be completed and returned by FAX (01992 503176) to authorise the collection of the above specified soil.

Thank you.
